

Colorado Child Support Guidelines

(For cases on or after **July 1, 2023** only)

Revised July 1, 2023

1. Preface

The Child Support Guidelines for Colorado were developed by the Colorado Child Support Commission and enacted by the Colorado General Assembly. As specified in the statute, the Guidelines have three objectives:

- 1) To establish as state policy an adequate standard of support for children, subject to the ability of parents to pay;
- 2) To make awards more equitable by ensuring more consistent treatment of persons in similar circumstances; and
- 3) To improve the efficiency of the court process by promoting settlements and giving courts and the parties guidance in setting the levels of awards.

The Guidelines can be found in §14-10-115, Colorado Revised Statutes (C.R.S.), and are consistent with other provisions of that section which place a duty for child support upon either or both parents based on their respective financial resources, the financial resources of the child, the needs of the custodial parent, the physical and emotional condition of the child, and the standard of living the child would have enjoyed had the marriage or civil union not been dissolved.

The Colorado Child Support Guideline is based on an Income Shares Model. This model provides an objective basis for determining the average costs of children in households across a wide range of incomes. Because household spending on behalf of children is intertwined with spending on behalf of adults for most expenditure categories, it is difficult to determine the proportion allocated to children in individual cases, even with exhaustive financial affidavits. However, a number of authoritative economic studies provide estimates of the average amount of household expenditures on children in intact households. These studies have found that the proportion of household spending devoted to children is systematically related to the level of household income and to the number and ages of children.

Based on this economic evidence, the Colorado Child Support Guidelines calculate child support based on *each* parent's share of the amount estimated to have been spent on the child if the parents and child were living in an intact household.¹ If one parent has physical care for 273 or more overnights per year, the amount calculated for that parent is presumed to be spent directly on the child. For the other parent, the calculated amount establishes the level of child support. For cases with split or third party physical care, or extensive sharing of physical care, each parent's calculated share of child support is adjusted by the time spent with the child(ren).

2. Use of The Guideline

The Colorado Child Support Guidelines apply as a rebuttable presumption to all child support orders in Colorado, except as discussed below. The Guidelines must be used for temporary and permanent orders, and for separations, dissolutions, and support decrees arising despite non-marriage or non-civil union of the parties. The Guidelines must be used by the Court as the basis for reviewing the adequacy of child support levels in non-contested cases as well as contested hearings. The Court may exercise broad discretion in deviating from the Guidelines in cases where application would be inequitable to one of the parties or to the child. In cases where the award deviates from the Guidelines, however, the Court must provide written or oral findings of fact to substantiate the deviation.

¹For a detailed explanation of the Income Shares Model and the underlying economic evidence used as the basis for the Colorado Child Support Guideline, see [Robert G. Williams, Development of Guidelines for Child Support Orders \(National Center for State Courts: Denver, September 1987\)](#)

The Child Support Guidelines include a schedule of basic child support obligations that establishes the recommended amount of child support based on the number of children and parties' incomes. However, there are two low-income adjustments.

When the obligor's (the parent ordered to pay child support) monthly adjusted gross income is equal to or less than \$650, the Guidelines provide for a minimum order of \$10 per month, regardless of the number of children between the parties and regardless of how many overnights each parent cares for the children.

When the obligor's monthly adjusted gross income is equal to or less than \$1,500.00 but more than \$650, the Guidelines require the obligor pay \$50.00 per month for one child, \$70.00 per month for two children, \$90.00 per month for three children, \$110.00 per month for four children \$130.00 per month for five children, and \$150.00 per month for six or more children. The monthly child support obligation will be reduced if the custodial parent receives periodic disability benefits granted by the federal "Old-age, Survivors, and Disability Insurance Act" (also known as Social Security Disability Insurance or "SSDI") on behalf of dependent children due to the disability of the noncustodial parent. The monthly child support obligation will also be reduced if the custodial parent receives employer-paid retirement benefits from the federal government on behalf of dependent children due to the retirement of the noncustodial parent. The reduction will be equal to the amount of the benefits. The monthly child support obligation can also be adjusted to include a share of the work-related and education-related childcare costs, health insurance, extraordinary medical expenses, and other extraordinary adjustments as described in the statute in subsections (9) to (11), if, after these adjustments are made, the obligor's child support amount (basic obligation plus share of adjustments) does not exceed twenty percent of the obligor's adjusted gross income. If the obligor's calculated support amount exceeds twenty percent of the obligor's adjusted gross income, the child support obligation must be capped at twenty percent of the obligor's adjusted gross income. The minimum guideline amount for obligors earning less than \$1,500 per month shall not apply when each parent keeps the children more than ninety-two overnights each year. In no case, however, shall the amount of child support ordered to be paid exceed the amount of child support that would otherwise be ordered to be paid if the parents did not share physical custody.

The Guidelines provide calculated amounts of child support up to a combined adjusted gross income level of \$30,000.00 per month (\$360,000.00 per year). For cases that exceed this level, the court may decide on a case-by-case basis but may not order less than the amount on the schedule for \$30,000.00.

3. Determination of Child Support Amount

To calculate child support for children who are under 19 or still in high school, or disabled, use: Worksheet A when one parent maintains physical care of the child for 273 or more overnights per year [see (4)(I) below]; use Worksheet B if each parent shares physical care of the child for more than 92 overnights per year [see (4)(J) below].

(A) Income

- 1) Definition.** For purposes of this Guideline, "income" is defined as actual gross income of the parent, if employed to full capacity or potential income if unemployed or underemployed. Gross income of each parent should be determined as specified below and entered on Line 1 of the appropriate worksheet.
- 2) Gross income.** Gross income includes income from any source and includes, but is not limited to, income from salaries; wages, including tips declared by the individual for purposes of reporting to the federal internal revenue service or tips imputed to bring the employee's gross earnings to the minimum wage for the number of hours worked, whichever is greater; commissions; payments received as an independent

contractor for labor or services, which payments must be considered income from self-employment; bonuses; dividends; severance pay; pensions and retirement benefits; royalties; rents; interest; trust income; annuities; capital gains; and moneys drawn by a self-employed individual for personal use that are deducted as a business expense, which moneys must be considered income from self-employment; social security benefits, including social security benefits actually received by a parent as a result of the disability of that parent or as the result of the death of the minor child's stepparent; workers' compensation benefits; unemployment insurance benefits; disability insurance benefits; funds held in or payable from any health, accident, disability, or casualty insurance to the extent that such insurance replaces wages or provides income in lieu of wages; monetary gifts; monetary prizes, excluding lottery winnings not required by the rules of the Colorado Lottery Commission to be paid only at the lottery office; income from general partnerships, limited partnerships, closely held corporations, or limited liability companies, however, if a parent is a passive investor, has a minority interest in the company, and does not have any managerial duties or input, then the income to be recognized may be limited to actual cash distributions received; alimony or maintenance (spousal/partner support) received; and overtime pay only if the overtime is required by the employer as a condition of the employment.

For income from self-employment, rents, royalties, proprietorship of a business, or joint ownership of a partnership or closely held corporation, gross income is defined as gross receipts minus ordinary and necessary expenses required to produce such income. "Ordinary and necessary expenses" does not include amounts allowable by the Internal Revenue Service for the accelerated component of depreciation expenses or investment tax credits or any other business expenses determined by the court to be inappropriate for determining gross income for purposes of calculating child support. In general, income and expenses from self-employment or operation of a business should be carefully reviewed to determine an appropriate level of gross income available to the parent to satisfy a child support obligation. In most cases, this amount will differ from a determination of business income for tax purposes. Expense reimbursements or in-kind payments received by a parent in the course of employment, self-employment, or operation of a business shall be counted as income if they are significant and reduce personal living expenses.

Gross income does not include benefits received from means-tested public assistance programs, including but not limited to assistance provided under the Colorado Works Program, Supplemental Security Income (SSI), Food Stamps, and General Assistance. Gross income does not include child support payments received; social security benefits received by a minor child or on behalf of a minor child because of the death or disability of a stepparent of the child; income from additional jobs that result in the employment of the obligor more than forty hours per week or more than what would otherwise be considered to be full-time employment. Gross income does not include earnings or gains on a retirement account, including an IRA, which earnings or gains must not be included as income unless or until a parent takes a distribution from the account. If a distribution from a retirement account may be taken without being subject to an IRS penalty for early distribution and the parent decides not to take the distribution, the Court may consider the distribution that could have been taken in determining the parent's gross income if the parent is not otherwise employed full-time and the retirement account was not received pursuant to the division of marital property.

- 3) Potential income.** If a parent is voluntarily unemployed or underemployed, child support shall be calculated based on a determination of potential income, except that a determination of potential income should *not* be made for a parent who is physically or mentally incapacitated or is caring for a child under the age of 24 months for whom the parents owe a joint legal responsibility, or for an incarcerated parent sentenced to one hundred eighty days or more. A parent is not deemed "underemployed" if their actual employment is temporary and is reasonably intended to result in higher income within the foreseeable future; or if their actual employment is a good faith career choice that is not intended to deprive a child of support and does not unreasonably reduce the support available to a child; or if the parent is enrolled full-time in an educational or vocational program or is employed part-time while enrolled in a part-time educational or vocational program, based on the institution's enrollment definitions, and the program is reasonably intended to result in a degree or certification within a reasonable period of time; completing the program will result in a higher income; the program is a good faith career choice that is not intended to deprive the child of support; and the parent's participation in the program does not unreasonably reduce the amount of child support available to a child.

In determining potential income, the court or delegate child support enforcement unit shall consider, to the extent known, the specific circumstances of the parent, including consideration of the following information,

when available: the parent's assets; residence; employment and earnings history; job skills; educational attainment; literacy; age; health; criminal record; other employment barriers; record of seeking work; the local job market; the availability of employers hiring in the community; prevailing earnings level in the local community; and other relevant background factors in the case.

Determination of potential income shall be made by determining employment potential and probable earnings level based on recent work history, occupational qualifications, and prevailing job opportunities and earnings levels in the community. If there is no recent work history and no higher education or vocational training, it is suggested that income be set at least at the minimum wage level.

- 4) Income verification.** Income statements of the parents should be verified with documentation of both current and past income. Suitable documentation of current earnings (at least three full months) includes pay stubs, employer statements, or receipts and expenses if self-employed. Documentation of current income must be supplemented with copies of the most recent tax return to provide verification of earnings over a longer period.

(B) Alimony, Maintenance (spousal/partner support), Pre-existing Child Support Obligations, Responsibility for Other Children, and Contributions to Post-secondary Education

When alimony or maintenance paid or received by a party is not taxable to the recipient and not tax deductible to the payor, it is adjusted by a multiplier before it is added as income to the recipient or deducted from the income of the payor. The multiplier that is used depends on whether the alimony or maintenance is paid and received by the same parties as the child support calculation or not and the combined adjusted monthly gross income of the parties.

If the alimony or maintenance order is between a party in the child support calculation and another person who is not a party in the child support calculation, and is non-taxable and non-tax-deductible, the amount of alimony or maintenance is multiplied by 1.25 and then added as a source of income to the receiving parent (Line 1a) or deducted from the gross income of the paying parent (Line 1b). If the alimony or maintenance is taxable and tax-deductible (common in orders entered prior January 1, 2019) then use the unadjusted amount of maintenance.

If the alimony or maintenance is between the same parties as the child support calculation, and is non-taxable and non-tax-deductible, then the amount of alimony or maintenance is multiplied by 1.25 if the parties' combined adjusted monthly gross income is ten thousand dollars or less and is multiplied by 1.33 if the parties' combined adjusted monthly gross income is more than ten thousand dollars. The adjusted amount of alimony or maintenance is then added as a source of income to the receiving parent and deducted from the gross income of the paying parent. If the alimony or maintenance is taxable (common in orders entered prior January 1, 2019) then use the unadjusted amount of maintenance.

The amount(s) of any pre-existing court order(s) for child support (Line 1c) should be deducted from gross income to the extent payment is actually made under such order(s).

The amount of legal responsibility a parent has for children not involved in this action, but living in his/her home, should be deducted from gross income on Line 1d. The amount entered on Line 1d should be 75% of the amount listed in the schedule of basic support obligations, which would represent 75% of a support obligation based only on the responsible parent's gross income, without any other adjustments, for the number of children for whom the parent is also responsible, pursuant to §14-10-115(6)(b), C.R.S.

If a parent has children not involved in this action and not living in that parent's home, and there is no pre-existing court order for child support for those children, then the amount of money payments actually paid by the parent in support of those children should be deducted from the parent's gross income on Line 1d. However, documented proof of money payments for support of those children is required and the amount listed on Line 1d cannot exceed the amount listed in the schedule of basic support obligations.

The adjustment applies to a party's natural or adopted children, but not to stepchildren, unless a prior court order has established a party's legal responsibility for them. Use of the adjustment is appropriate at the time of the establishment of a child support order or in a proceeding to modify an existing order. However, it may not be used to the extent the adjustment contributes to the calculation of a support order lower than the previously existing order for the children who are the subject of the modification proceeding.

If modifying an existing child support order, the amount of each parent's court-ordered contribution for post-secondary education for a child should be subtracted from each parent's gross income on Line 1e.

(C) Basic Child Support Obligation (Amount from Schedule)

The basic child support obligation is determined using the Schedule of Basic Child Support Obligations. For combined monthly adjusted gross income amounts falling between amounts shown in the schedule, basic child support amounts should be interpolated. The number of children refers to children for whom the parents share joint legal responsibility and for whom support is being sought.

(D) Child Care Costs

Childcare costs incurred due to employment or job search of either parent (minus federal tax credit if allowed by the IRS) are entered on Line 6a of Worksheet A and Line 10a of Worksheet B. Childcare costs incurred on behalf of the children due to the education of either parent are entered on Line 6b of Worksheet A and Line 10b of Worksheet B. Such costs should not exceed the level required to provide quality care from a licensed source for the children.

The credit against income tax for childcare due to employment or job search is provided under Sec. 44A of the Internal Revenue Code. The value of this tax credit, if allowed by the IRS, should be subtracted from actual costs for childcare due to employment or job search (refer to IRS Form 2441). The credit is only available to the parent that has the most overnights scheduled with the child(ren). In situations where the parent with fewer scheduled overnights pays work-related childcare, put the actual amount spent in this category on the form.

(E) Health Insurance

Amounts paid by parties or by a parties' spouse/partner for health insurance premiums which cover the child(ren) subject to the order are apportioned between the parties. The amount included in the child support calculation is the amount of the health insurance premium actually attributable to the child(ren) subject to the order. If this amount is not available or cannot be verified, the total cost of the premium is divided by the total number of persons covered by the policy and then multiplied by the number of children covered by the policy who are subject to the order. This result is entered on Line 6c on Worksheet A or Line 10c on Worksheet B. A space to assist in this calculation is provided on page 3 of Worksheet A and page 2 of Worksheet B.

Health insurance includes medical, or medical and dental insurance carried by either parent or by the parties' spouse. The parent requesting an adjustment for health insurance premium costs must submit proof that the child(ren) is enrolled in an insurance plan and proof of the cost of the premium.

(F) Extraordinary Medical Expenses

Any extraordinary medical expenses are entered on the worksheet (Line 6d on Worksheet A, Line 10d on Worksheet B) and added to the basic child support obligation. Extraordinary medical expenses, including copayments and deductible amounts, are uninsured expenses in excess of \$250.00 per child per year. Extraordinary medical expenses include, but are not limited to, such costs as are reasonably necessary for orthodontia, dental treatment, asthma treatments, physical therapy, vision care, professional counseling or psychiatric therapy for behavioral or mental health disorders, and any uninsured chronic health problem.

(G) Extraordinary Expenses

Other extraordinary expenses are entered on the worksheet (Line 6e on Worksheet A, Line 10e on Worksheet B) and added to the basic child support obligation. Other extraordinary expenses may include:

- 1) Any expenses for attending any special or private elementary or secondary schools to meet the particular educational needs of the child or public-school mandatory school fees; and
- 2) Any expenses for transportation of the child, or the child and an accompanying parent if the child is less than 12 years old, between the homes of the parents.

(H) Extraordinary Factors actually diminishing the basic needs of the child.

Any additional factors that actually diminish the basic needs of the child may be considered for deductions from the basic child support obligation. The amount of any such factor is entered on the worksheet (Line 6f on Worksheet A, Line 10f on Worksheet B) and subtracted from the basic child support obligation.

(I) Computation of Child Support—Sole Physical Care for 273 or more overnights per year (use Worksheet A)

To determine child support using Worksheet A, enter all forms of monthly gross income listed in Line 1 and then calculate monthly adjusted gross income on Line 2. Next, calculate each parent's percentage share of the total adjusted gross income on Line 3. Select the amount of child support from the Child Support Schedule (included below) based on the combined income on Line 2 and put the amount of child support in Line 4a. If the combined income on Line 2 is between the amounts listed on the Child Support Schedule, interpolate to determine the child support amount using the instructions in the next paragraph. Multiply the amount on Line 4a times each parent's percentage share in Line 3 to determine each parent's share of the basic obligation. If the monthly adjusted gross income of the parent with fewer overnights, or the parents' combined monthly adjusted gross income, is less than \$1500, use the Low-Income Adjustment Worksheet on page 2 to determine any low-income adjustment.

To interpolate, subtract the child support amount from the schedule associated with the listed combined income below the parties' actual combined income from the child support amount from the schedule associated with the listed combined income above the parties' actual combined income. Now, divide that number by 50. Next, multiply the result by the dollar amount the parties' actual combined income is above the listed combined income amount on the schedule and round to the nearest whole number. Add this number to the child support amount from the schedule associated with the listed combined income below the parties' actual combined income. This amount is the interpolated amount of child support. For example, if the parties' combined income is \$3,125 and there is 1 child subtract \$548 (the child support amount for \$3,100) from \$556 (the child support amount for \$3,150) for a result of \$8. Divide \$8 by 50 for a result of 0.16. Now multiply 0.16 times 25 (the amount \$3,125 is greater than \$3,100) for a result of \$4. Add \$4 to \$548 for an interpolated child support amount of \$552.

The total adjustments allowed for each parent are calculated by: i) adding the amount of expenses paid directly by each parent, as discussed in (D) through (G) above (Lines 6a through 6e); ii) subtracting any extraordinary adjustments discussed in (I) above (Line 6f); and iii) adding each parent's column. Calculate each parent's fair share of the adjustments by multiplying the amount in Line 7's Combined column by Line 3 for each parent. Please note that if the paying parent qualifies for the \$10 minimum order low-income adjustment, because their monthly adjusted gross income is less than \$650, the adjustments listed in Line 6 do not apply and the recommended child support order is \$10 for the paying parent, regardless of the number of children.

Add each parent's basic obligation (Line 4b, or Line 5 for the parent receiving any low-income adjustment) and each parent's share of adjustments (Line 8) to determine each parent's share of the total obligation. (If a parent qualifies for a low-income order of \$50/70/90/110/130/150 because their adjusted gross income is between \$650 and \$1,500, and Line 8 is 20% or more of their adjusted gross income, no adjustments are applied and the recommended order is \$50/70/90/110/130/150 and that amount should be listed on Line 11). On Line 10, bring down the amount from Line 7 of the parent with the least parenting time only. This is that parent's share of the adjustments. On Line 11, subtract Line 10 from Line 9. This is the amount payable as a child support order. If the result is a negative number, the recommended amount is \$0. Although a monetary obligation is computed for each parent as child support, the receiving parent's share is not entered on Line 11 because it is not payable to the other parent as child support. Instead, the receiving parent's share is presumed to be spent directly on the child.

(J) Computation of Child Support—Shared Physical Care (use Worksheet B)

Where each parent exercises extensive physical care, (that is, spends at least 93 overnights per year) the Guideline provides that a child support obligation be computed for **each** parent by multiplying that parent's child support obligation by the percentage of time the child spends with the other parent. The respective child support obligations are then offset, with the parent owing more child support paying the difference between the two amounts.

Child support for cases with shared physical care is calculated using Worksheet B. An adjustment for shared physical care is made **only** when each parent has the child for more than ninety-two overnights per year. The proportion of time with each parent is computed on Lines 7 and 8. On Line 7 is entered the number of overnights spent with each parent. These must total 365.

When two or more children are included in the child support worksheet calculation and the parties have a different number of overnights with two or more of the children, the number of overnights used to determine

child support is determined by adding together the number of overnights for each child and then dividing that number by the number of children included in the child support worksheet calculation. This adjustment, previously referred to as *Quam* analysis, is now included in statute at §14-10-115(8)(g). If the child spends part of the time in the physical care of another person (e.g. a grandparent), that time should be credited to the parent responsible for the child during that time. If neither parent or both parents have responsibility, the time should be divided between the parents. On Line 8, the percentage of time with each parent is calculated by dividing the number of overnights with each parent by 365.

On Line 4, the basic child support obligation from the child support schedule is entered. (Use the interpolation instructions in Paragraph I above, if necessary). This amount is then multiplied by 1.5 to calculate the shared care basic obligation. This amount is entered on Line 5. Each parent's share of the shared care support obligation based on the parent's percentage share of total income is calculated on Line 6 by multiplying the income share of each parent from Line 3 times the shared care support obligation from Line 5. The next step is to calculate the support obligation of each parent for the time the child(ren) spends with the other parent. This is done on Line 9 by multiplying the amount from Line 6 by the percentage found in Line 8 for the OTHER parent.

Adjustments to the shared care support obligation are entered on Line 10. The expenses, directly paid by each parent or by a parent's spouse/partner, for work-related net child care costs are entered on Line 10a, education-related child care on Line 10b, health insurance premiums on Line 10c, extraordinary medical expenses on Line 10d, extraordinary expenses on Line 10e, and extraordinary adjustments on Line 10f. The amounts from Lines 10a through 10e are added while the amount from Line 10f is subtracted, and the total is entered on Line 11. The amounts entered on Line 11 for each parent are multiplied by each parent's income share from Line 3 and entered on Line 12 as each parent's fair share of the directly paid expenses. Subtracting the amount on Line 12 from Line 11 results in the amount each parent has paid in excess of their share of these expenses. This result is entered on Line 13, except that if the result is a negative number, zero is entered. By subtracting this excess amount from each parent's support obligation on Line 9, each parent's adjusted support obligation is entered on Line 14. Line 14 can be a negative number if a parent's excess direct payments of extraordinary expenses is greater than that parent's proportionate share of basic support.

The child support order is listed on Line 15 by subtracting the lesser amount in Line 14 from the greater amount and entering the result in the column of the parent with the greater amount. The child support order amount cannot exceed the amount of child support that would otherwise be ordered to be paid if the parents did not share physical custody. Therefore, compare the Worksheet B to Worksheet A to determine which recommends the lowest amount.

Note that this shared physical care adjustment is an annual adjustment only and should not be used when the proportion of overnights exceeds twenty-five percent for a shorter period, e.g., a month. For example, child support is not reduced during a month long summer visitation.

If either of the parents is directly paying a disproportionate amount of the Basic Support Obligation (clothing, housing, food, ordinary medical expenses, for example) the Recommended Child Support Order amount may be deviated from in accordance with Section 14-10-115(8)(e), C.R.S.

(K) Computation of Child Support—Split Physical Care

Split care refers to a situation in which there is more than one child and each parent has physical care of at least one of the children or they share care of some, but not all, children. In a split care situation, the support is calculated by using two Worksheets A, or a combination of Worksheets A and B, to determine the support each parent owes the other. The resulting obligations are then offset, with one parent owing the other the difference as a child support order.

Begin by working a Worksheet A calculation for one parent. List the child(ren) for whom the other parent has sole physical care. Enter each parent's income and the appropriate deductions to determine a combined adjusted gross income figure. On Line 4, enter the amount from the support schedule for the combined income level for the number of children living with the other parent only. Other expenses should be entered only to the extent that they are related to that child(ren). For example, consider a parent who covers all three children on his health insurance plan, the children's portion of which is \$150.00 per month. If that parent has sole physical

care of one child, \$100.00 is entered on Line 6c on the worksheet for his obligation, while \$50.00 is entered on the same line when calculating the other parent's obligation on a separate Worksheet A.

Worksheet A is then completed for that parent. Next, calculate a Worksheet A amount for the other parent based on the number of children living with the first parent or do a Worksheet B for any children whose physical care is shared. Then subtract the lesser of the two total amounts from the greater and use the difference between these two obligations as the child support order for the parent with the larger of the two obligations.

(L) Post-Secondary Educational Expenses

For child support orders established on or after July 1, 1997, post-secondary education expenses can be ordered by the court *only* upon written agreement by the parents *and* approval by the Court. These approved expenses should be included on the Support Order on the line for monthly current support.

4. Modification

The provisions of a child support order may be modified only if there is a substantial and continuing change of circumstances. If application of the Guideline would result in a new order that is less than ten percent different, then the circumstances are considered not to be a substantial and continuing change.

~~This form is a synopsis only of the Guideline. For additional information, please refer to the entire text of the Guideline found in §14-10-115, C.R.S., as amended, or consult legal counsel.~~

BASIC CHILD SUPPORT OBLIGATION

NUMBER OF CHILDREN

Obligor's Adjusted Gross Income	1	2	3	4	5	6 or more
Income \$0 to \$650	10	10	10	10	10	10
Income \$651 to \$1500	50	70	90	110	130	150
Combined Adjusted Gross Income	1	2	3	4	5	6 or more
1500.00	50	70	90	110	130	150
1550.00	85	105	125	145	165	185
1600.00	120	140	160	180	200	220
1650.00	155	175	195	215	235	255
1700.00	190	210	230	250	270	290
1750.00	225	245	265	285	305	325
1800.00	260	280	300	320	340	360
1850.00	295	315	335	355	375	395
1900.00	330	350	370	390	410	430
1950.00	360	385	405	425	445	465
2000.00	368	420	440	460	480	500
2050.00	377	455	475	495	515	535
2100.00	385	490	510	530	550	570
2150.00	393	525	545	565	585	605
2200.00	401	560	580	600	620	640
2250.00	410	595	615	635	655	675
2300.00	418	630	650	670	690	710
2350.00	426	658	685	705	725	745
