COMPANY CORE VALUES

QUALITY	The Quality of our product defines the pride we take in servicing our customer.
FAMILY	We are deeply passionate about family, family we work with, family we work for and our family of customers.
RESILIENT	We never lose...We either Win or We Learn.
INNOVATION	Through innovation we are recognized as one of the best in the world at designing and manufacturing remote drug delivery systems.
INTEGRITY	We conduct our business practices ethically and with honor.
ACCOUNTABILITY	Our Associates accept responsibility for the success of the company and are held accountable for the results of their performance.

Pneu-Dart, Inc. offers the best remote injection equipment for your remote drug delivery needs. Our remote drug delivery systems are designed to capture or medicate while minimizing stress on the animal.

Pneu-Dart, Inc. associates take great pride in providing the best possible products and services at an affordable price. We build the experience of an established business with the latest advances in remote drug delivery systems into every Pneu-Dart, Inc. product. Our products are as simple to use, as they are functional. Just connect with your target and let us do the rest. Whether you are home on the range, deep in the back country, or out on safari, you'll be sure to hit your mark the first time — every time with Pneu-Dart.

While our products are most typically used for the control and capture of free-ranging ranch-raised animals, Pneu-Dart, Inc. makes a product to handle every target situation, even from inside a helicopter! This catalog provides detailed information on our complete line of products. Browse our expertly crafted RDD devices, tranquilizer guns (or "projectors" as we prefer to call them), and a full range of accessories.

Pneu-Dart, Inc. was born in the majestic mountains of Central Pennsylvania in the village of Barbours. Founded in 1967, Pneu-Dart started as a small basement operation developing remote drug delivery devices for livestock and wild game industries. Our mission was based simply on the philosophy of giving the customer what it wants – and what works. We have enjoyed steady growth over the years due to invaluable feedback from ranchers and rangers. These ideas have improved and continue to improve the product line. In fact, eight of the seventeen projectors we have produced are still in production today. Our RDD devices have been modified and perfected to the point that they are unparalleled in design and effectiveness!

RDD DEVICES

PNEU-DART Remote Drug Delivery Devices

Polycarbonate & Aluminum Body

Whether your task is to medicate or capture, Pneu-Dart has the ideal remote delivery system for you. Our disposable RDD Devices come in a broad array of sizes, are easy to fill, and are color coded for speedy identification.

NEW IN 2016 - PROUDLY INTRODUCING

SLO-INJECT®

PATENTED RDD DEVICE TECHNOLOGY

- Reduced rate of injection.
- Virtually no tissue damage to the animal.
- Minimizes potential for "bounce-outs".
- Now constructed with structurally superior and chemically resistant resin.
- Helps to ensure ideal delivery.

First and Only disposable Slo-Inject® RDD device on the market!

TYPE 'C' DISPOSABLE RDD DEVICES

Pneu-Dart Type 'C' disposable RDD Devices are 13mm caliber and are designed to provide precise drug delivery in a convenient, inexpensive projectile. These RDD Devices are appropriate for use on small or large animals. Color coded in orange, Type 'C' RDD Devices are best used with our cartridge projectors. These RDD Devices are used with the following Pneu-Dart Model Projectors: Model 389 – Cartridge Fired, Model 196 – Cartridge Fired, and Model 193 – Cartridge Fired (Model retired)

Note: Type 'C', and 'P' RDD Devices appear to be identical, but the 'C' device has a slightly larger tail diameter for use in our cartridge-fired projectors.

TYPE 'P' DISPOSABLE RDD DEVICES

Pneu-Dart Type 'P' RDD Devices (color coded in yellow) are for use with our CO2/ Air projectors and Blo-Jector. As with the Type 'C' RDD Devices, these RDD Devices are appropriate for use on small or large animals. These RDD Devices are used with the following Pneu-Dart Model Projectors: X-Caliber Gauged Projector, X2 Gauged Projector, Model 176B – CO 2 Air, Model 178 B – Air, Model 179B Short Range Projector – CO2, and Model 190B Short Range Projector – Air

TYPE 'U' DISPOSABLE RDD DEVICES

Type 'U' RDD Devices are our most versatile and universal tail design for Pneu-Dart Projectors. Type U tails for 6cc – 10cc RDD Devices are our standard tail design for any projector. As an option, Type U tails have been created to support 0.5cc – 5cc RDD Devices as well. Many of our more seasoned customers may be familiar with these as 'P' Type RDD Devices with Flight Stabilizer Tails.

POLYCARBONATE BODIES (.5 CC TO 2 CC)

With the advent of our patented Slo-Inject® technology Pneu-Dart has fortified its plastic RDD Device body by transitioning over to an opaque polycarbonate resin. Equipped with a color-coded polypropylene Type 'C' or Type 'P' tail, the Slo-Inject® PolyCarb RDD Device possesses enhanced mechanical and superior chemical resistance properties.

ALUMINUM BODIES (3 CC - 10 CC)

RDD devices (3.0cc - 10.0cc) are laser engraved with the volume of the injectable liquids capacity. With this value added feature "at-a-glance" identification will help provide the best treatment possible. Made out of aluminum tubing, our RDD Devices are designed to ensure optimum performance under any condition.

Proper remote drug delivery must be delivered to the 0-Zone™ injection site. Pneu-Dart recommends consistently delivering an appropriate sized practice device to a six-inch target before attempting to deliver any medication remotely. The species neutral 0-Zone™ is on the side of the neck forward of the shoulder.

HOW THEY WORK

Type 'C', 'P' and 'U' RDD Devices contain a small explosive charge which detonates on impact and quickly injects the liquid. RDD Devices equal to or less than 1 cc do not require retention (wire barb or gelatin collar) due to the rate of injection. As a consequence of the device mechanics, the RDD Device will "flash" when activated, a real asset in low-light conditions.

CANNULA LENGTHS

RDD Devices are available with 14-gauge cannula in lengths of 3/8", 1/2", 3/4", 1", 1 1/4", 1 1/2" and 2".

RDD Devices 1.5 cc through 10 cc are equipped with a gelatin collar. 0.5cc - 10cc can be ordered with a wire barb. 3/8" cannula are available in plain only. 1/2" cannula are available in gelatin collars or wire barbs. We do not recommend wire barbs or gelatin collars on 1/2 cc or 1 cc devices; however, they are available at an additional cost. Gelatin collars comprise of an inert material retaining the RDD device in place until the injection is made, and after several minutes will liquefy, allowing the RDD device to fall freely from the animal.

Gelatin Collars

GREEN and RED Gelatin Collars
Designed to assist in easy identification we have elected to use two colors for our Gelatin Collars. The traditional Green color is now used on all end-port discharge cannulas. The Red Gelatin Collars are now assigned to our Tri-Port (end and side port) discharge cannulas. Although different in color our gelatin collars function equally as they have in the past.

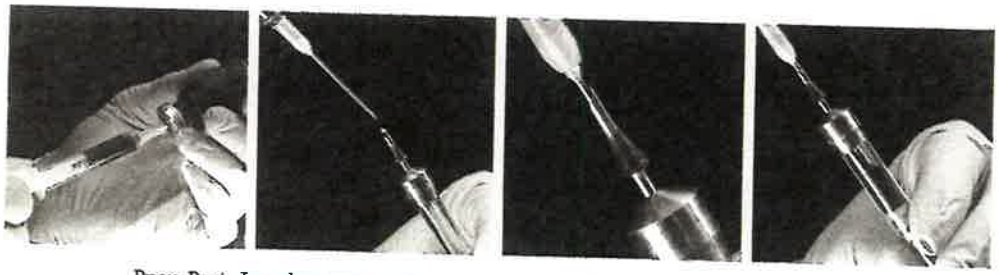
HOW TO FILL A RDD DEVICE

Recommendation: Wear latex gloves when filling remote drug delivery device (RDD device) with liquid.

1. Load Fill-Syringe with your desired liquid amount.
2. Hold RDD device upright at a 45 degree angle.
3. Using a clean 19-gauge Fill-Syringe needle, insert into the RDD device cannula (needle) and fill completely. The 19-gauge fill-needle must be 1/2" longer in length than the RDD device cannula.
4. To avoid any displaced liquid, the RDD device should remain upright until ready to fire.



Pneu-Dart, Inc. does not condone nor promote the extra-label use of veterinary pharmaceuticals unless on order and under supervision of a licensed veterinarian.

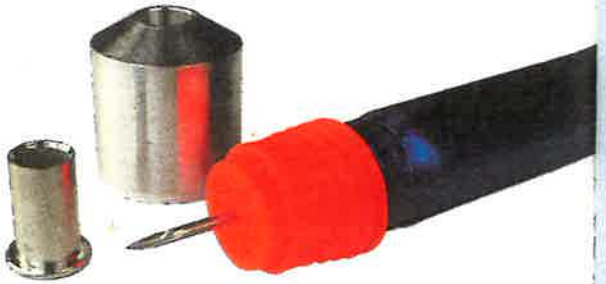
Specialty Dart Types

Specifically Designed To Meet Your Needs

DNA RDD DEVICE



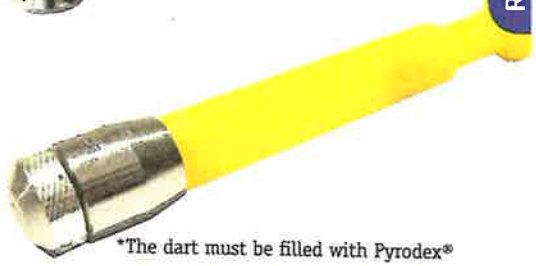
Working closely with our customers, we designed and built our DNA RDD Device on a 2cc body to remove a sample consisting of both the dermis and hypodermis material. Attached to the aluminum nose cone is a stainless steel cutter measuring approximately 0.165" × 0.150" and encompasses a barbed "capture claw" to ensure sample retention. Field trials produced excellent results yielding three independent DNA tests from a single sample.

Upon impact, the DNA RDD Device retains a sample and falls to the ground. Equaling all Pneu-Dart RDD Devices, our DNA devices are available in the following three tail designs: Type 'C' for our Cartridge Fired Projectors; Type 'P' for CO2 and Air Activated Projectors; and Type 'U' with flight stabilizers.

BIOPSY RDD DEVICE

Ideal for gathering sample tissue for analysis, the Pneu-Dart Biopsy RDD Device contains a ferrule "cutter" on the outside protecting the three barbs on the inside of the cylinder. Upon hitting your desired target, simply unscrew the farrel containing the tissue sample

BEAR SCARE RDD DEVICE



Uniquely designed, our Bear Scare Device is ideal for "scaring" off unwanted animals. This 1.5 cc RDD Device, scored along the sides, milled and tapped with a screw, blows apart upon impact without harming the animal.*

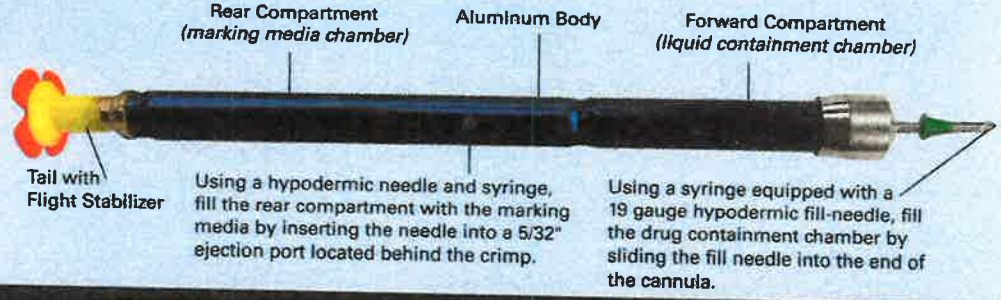
*The dart must be filled with Pyrodex® powder. (Pyrodex® powder not included.)

MARKING RDD DEVICE

Marking Darts are designed solely to put a visible mark on the animal. The marking media is traditionally not recommended to be greater than 4 cc. In fact, amounts of 2 cc marking media have succeeded for many customers' "in-the-field" applications. (standard volume is 2 cc.) Note: We do not provide the marking media used in Marking Device.

INJECTION MARKING RDD DEVICE

Injection Marking Devices are designed to inject the liquid while simultaneously placing a visible mark on the animal. Liquid delivery options for 1 cc – 3 cc are available. Call our Customer Care Providers for further details.



WE STRONGLY RECOMMED THAT YOU PRACTICE PRACTICE PRACTICE!

PRACTICE RDD DEVICES

Use our Practice Devices to sight in or fine tune your projector prior to use in the field. Available in all RDD Device sizes (.5 cc – 10 cc) and in Type 'P', 'C', or 'U' configurations.

414 PLL TRANSMITTER DEVICE DESIGN & PERFORMANCE

Easily track your darted animal with our 414 PLL (Phase Lock Loop) Transmitter RDD Device – a microprocessor control advanced feature transmitter with solid state components.

414 PLL TRANSMITTER RDD DEVICE SPECIFICATIONS

- Our new UNI-body case design fortifies the transmitter to withstand kinetic energy impact values FIFTEEN times greater than anything else on the market.
- Effective range up to 1.5 miles depending upon topography.
- Battery life provides up to 12 continuous hours of transmission using a silver oxide battery.
- Frequency and temperature stable operation (operating temperature between -40 to 150°F).
- Practical performance features including the ability to maintain high power output transmission qualities even as the battery drains, found nowhere else.
- Once tightened, the battery cap activates the transmitter manually.
- 28 milliseconds pulse rate, 50 pulses per minute.
- Magnetic tap-on tap-off activation with pulsing LED light for easy detection.

DIGITAL TRACKING RECEIVER

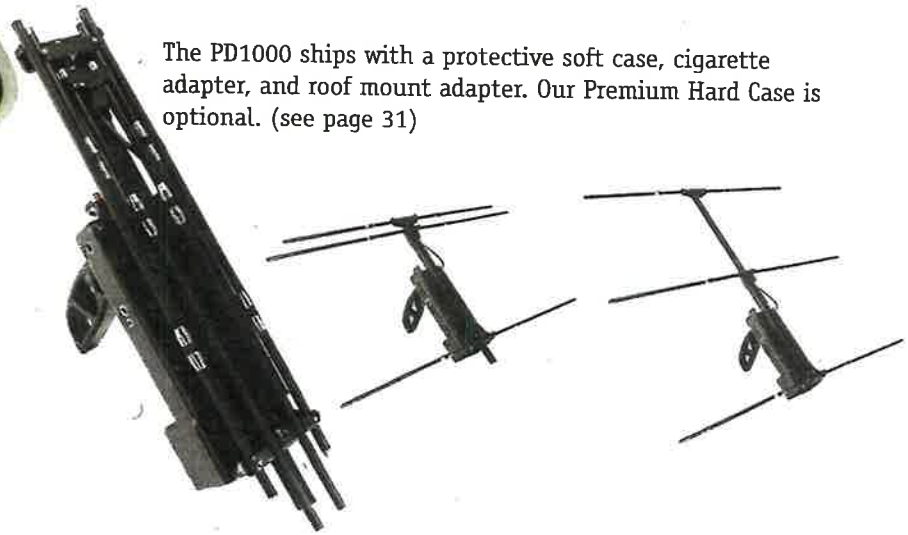
State of the Art Tracking

PNEU-DART PD1000 DIGITAL TRACKING RECEIVER

The new PD1000 combines superior range and convenience in a compact and rugged design. The PD1000 is great for tracking our PLL Transmitters under any conditions. The digital PD1000 won't sound like your old receiver because it has unique Polyphase Filters that dramatically reduce the background noise. The quietness means that you will hear the desired signal crystal clear and be able to keep the volume down without blasting your ears with noise. This quietness translates into better range and increased speed in finding your transmitter.

- Highest sensitivity in tracking receivers
- Best pinpoint accuracy available
- Polyphase filter reduces background noise
- Easy tuning and smooth tones
- Three-position range switch
- Less adjacent channel interference
- Uses common, easy to find AAA Batteries
- Full three-year warranty
- Outside use in rain does not void warranty
- Loud speakers top and bottom

The PD1000 ships with a protective soft case, cigarette adapter, and roof mount adapter. Our Premium Hard Case is optional. (see page 31)



PNEU-DART PROJECTORS

Gauged CO_2, Cartridge Fired, CO_2 and Air Fired

Pneu-Dart projectors are engineered for versatility, functionality, and ruggedness. Our rifles and pistols are expertly crafted to handle short and long-range targets with ease and accuracy.

X-CALIBER™ (GAUGED CO_2 - TYPE P OR U RDD DEVICES)
Made In America, Pneu-Dart's most recent innovation – the X-Caliber – has become the most attractive and practical gas-based projector ever built. Released in 2007, the X-Caliber has become a favorite for those seeking a versatile, pressure-gauged full-volume dump, lightweight projector without sacrificing range or accuracy.

Available Color Options:
True Timber Camo or Satin Black

DID YOU KNOW?

All Pneu-Dart projectors have mechanically adjustable power controls that makes for ideal delivery at close range or sizable distance, even from the bird's eye view of a helicopter. This allows for quiet propulsion and less trauma to the animal when proper muzzle velocity is achieved.

PROJECTORS

The X-Caliber's clean, unique design possesses a variety of features the industry has yet to experience.

- Located directly behind the urethane coated forearm is our rotating power control engineered to vary the muzzle velocity without taking your eye off the target.
- Constructed of machined aluminum and coated with a handsome, elements-resistant, satin finish, the X-Caliber is the best and most versatile of Pneu-Dart's rifled bore projectors.
- Protective gauge housing
- Spring-loaded rotating butt plate for quick loading

BENEFITS OF THE X-CALIBER:

- Quiet (virtually silent)
- Dart ranges are the greatest and the most accurate in the history of the company.
- .5 cc – 10 cc RDD Device
- Most affordable on a per shot basis
- Barrels are constructed of a 416-R stainless steel.
- O-rings are rated from -40 to 400° F.

The X-Caliber ships with a hard shell case.

The X-Caliber is ideal for anyone. The advanced features and benefits make it a superior projector on the market.

X-2™ (GAUGED CO_2 PISTOL - TYPE P OR U RDD DEVICES)

Pneu-Dart is pleased to announce the most innovative and practical gas-based short range projector—the X-2. Constructed of durable 6061 machined aluminum and coated with a sharp, elements-resistant anodized finish, the X-2 is the finest and most versatile short range projector ever built.

Shown with Laser Sight (optional)

Available Color Options:
True Timber Camo with Timber Trim
True Timber Camo with Black Trim
Satin Black with Black Trim
Satin Black with Silver Trim

Made in America, the X-2's sleek design possesses a variety of features, including a rotating rear barrel port engineered for quick and efficient dart loading.

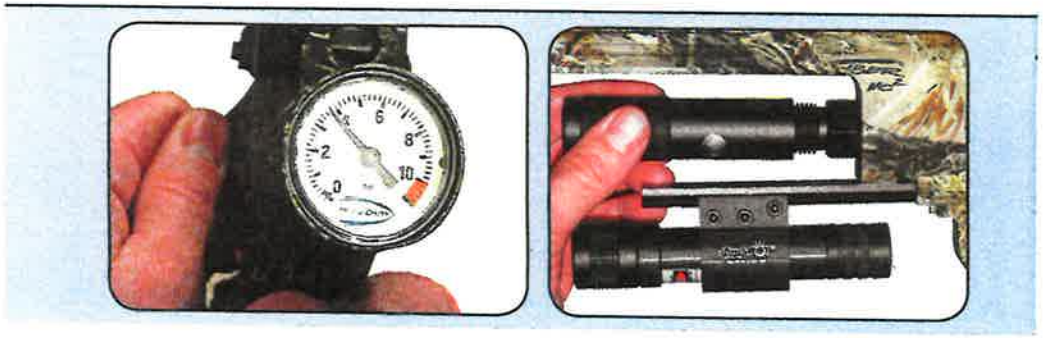
Additional Enhanced Features:

- Protective gauge housing
- Rotating rear barrel port for quick loading
- Fingertip muzzle velocity control
- Rifled 14 inch fluted stainless steel barrel
- 12 gram CO_2 air source (6 shots/cylinder)
- Virtually silent dart propulsion
- Does NOT require federal firearm license
- Optional 11 mm smooth bore barrel sleeve
- Limited lifetime warranty

Benefits of the X-2:

- Quiet (virtually silent)
- 0.5 cc – 3 cc Type P or U RDD Device
- Most affordable on a per shot basis
- Barrels are anodized with dichromate seal minimizing any bore residue.
- O-rings are rated from -40 to 400° F.

The X-2 ships with a hard shell case.



MODEL 389 (CARTRIDGE FIRED - TYPE C OR U RDD DEVICES)

The Model 389 is the latest and most advanced cartridge-fired projector of the modern day era. Although unique, the Model 389 is a collaborative design based on its predecessor's best attributes. The Model 389 has proven to be the most versatile, accurate, and consistent cartridge-fired projector ever made. The hinged, breach loading dart barrel supports any size dart and is equipped with our revolutionary Airflow Control Ports. Our ACP technology aligns with the exiting gas at the muzzle, thereby virtually eliminating "tail-kick" of the dart. The five position power control has been moved closer to the shooter ensuring silent, quick, and safe power adjustment for any shot distance.

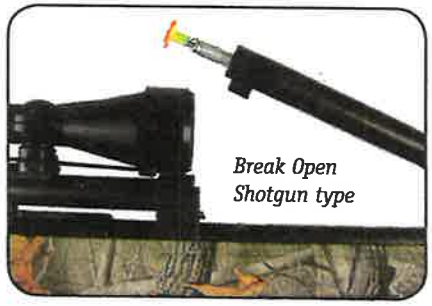
****Sale of the cartridge-fired rifles (196 and 389) is regulated by Federal Law. Interstate shipment is restricted to government agencies or holders of a Federal Firearm License. If you do not have a license, arrange for a local gun dealer to accept the rifle on your behalf. We must have a certified faxed, email, and/or mailed copy of this license on file prior to shipment.**



Break Open Shotgun type

MODEL 196 (CARTRIDGE FIRED - TYPE C OR U RDD DEVICES)

The Model 196 is an extremely rugged cartridge-fired projector that is functional and simple. The power control is on the rear of the gas block for convenience and will provide many years of service. Model 196EN comprises a uniform electroless nickel-plated finish mounted handsomely on a black composite stock.

****Cycling for Models 196 and 389**

Recent field studies have concluded that cartridge-based projectors perform best when given adequate time to cycle.

By definition: Cycling implies the ability for the gas chamber, within a cartridge-fired projector, to replenish itself with fresh oxygen. When achieved the projector yields a more consistent burn rate in each charge fired. Failure to do so results in less oxygen yielding lower combustion levels (e.g., reduced muzzle velocities) for subsequent darts fired at less than 30-second intervals.

PNEU-DART MODEL 176B (CO_2 FIRED - TYPE P OR U RDD DEVICES)

Breech Loading Medium to Long Range

The Model 176B, a breech loading projector, is a CO_2-operated dart projector recommended for close range shooting. It is ideal for penned animals and for use in populated areas (e.g., dog control). Under ideal conditions (no wind) these projectors are accurate up to 40 yards. By using the power control valve, caged animals can be shot as close as two yards without injury. This rifle is powered by a 12-gram CO_2 cylinder only.

The partial DNA profile from the swabs of glove compartment (Item 27.1) in your CBI case P20-1889 (Chaffee County Sheriff's Office case 20000911) has matched profiles from other cases; however, these comparisons are based on limited genetic data. The cases are all unsolved.
