CASE NO. 2023CW3041. COLORADO DIVISION OF PARKS AND WILDLIFE AND THE PARKS AND WILDLIFE COMMISSION, 6060 Broadway, Denver, CO 80216 (Please address all correspondence and inquiries regarding this matter to: Elizabeth M. Joyce 720-508-6761 and Ema I. G. Schultz 720-508-6307, Office of the Attorney General, 1300 Broadway, 7th Floor, Denver, CO 80203.) APPLICATION FOR CONDITIONAL SURFACE WATER RIGHTS AND CONDITIONAL WATER STORAGE RIGHTS, in DELTA COUNTY, COLORADO. Applicant, the Colorado Division of Parks and Wildlife and the Parks and Wildlife Commission (“CPW”), hereby files this application for water rights. **1. Name, mailing address, e-mail address, and telephone number of Applicant:** Colorado Division of Parks and Wildlife (“CPW”), Attn: Rob Harris, Water Resources Section Manager, 6060 Broadway, Denver, Colorado 80216, 303-291-7550; rob.harris@state.co.us. **2. Background:** The Escalante State Wildlife Area (SWA) consists of 1,064 acres in Delta County. The SWA supports recreation, hunting, fishing, wildlife viewing, and is actively managed to support wildlife habitat. The water rights that are the subject of this Application include new diversions from Cottonwood Creek and Roubideau Creek to support a native fish brood pond on the SWA near the confluence of Cottonwood Creek and Roubideau Creek. **3. Claim for Surface Water Right: KT Ditch** A. Name of Structure: KT Ditch. B. Location of Structure: See **Exhibit A** for a map of structures. i. Legal Description: SE1/4, SW1/4, Section 29, Township 15S, Range 96W, 6TH PM. ii. UTM Coordinates: Zone 13, 225925.9 Easting, 4289710.7 Northing, estimated from CDSS mapping software. C. Source: Cottonwood Creek, a tributary to Roubideau Creek, a tributary to the Gunnison River. D. Appropriation Date: June 5, 2023. i. How appropriation initiated: Staff investigations, performing a site visit, and filing of this application. ii. Date applied to beneficial use: n/a. E. Amount: 2 cfs, conditional. F. Uses: The KT Ditch water right will be used for direct flow purposes, and the KT Ditch structure will also be used to fill the KT Brood Pond, described in Paragraph 5 below. Direct flow uses include irrigation for wetlands and creation and maintenance of wildlife habitat, fish propagation, and to provide flow through or freshening flows to the KT Brood Pond for piscatorial, fish propagation, wildlife, and waterfowl purposes when the KT Brood Pond is holding stored water. i. Description of Irrigation: a. Proposed to be irrigated: approximately 3 acres. b. Description of irrigated acreage: Irrigation will occur within the footprint of the KT Brood Pond and on approximately one additional acre of land surrounding the pond, as shown on **Exhibit A**. Irrigation of the footprint of KT Brood Pond and land surrounding the pond will occur when the KT Brood Pond is operating on a direct flow basis or as a fill and drain event. During a fill and drain event, sufficient water will be diverted through the ditch to irrigate wetlands vegetation, and may be temporarily detained and allowed to drain out naturally to mimic natural wetland functions in a riparian corridor. **4. Claim for Surface Water Right: Hooley Ditch** A. Name of Structure: Hooley Ditch B. Location of Structure: See **Exhibit A** for a map of structures. i. Legal Description: SE1/4, SW1/4, Section 29, Township15S, Range 96W, 6th PM. ii. UTM Coordinates: Zone 13, 226168.5 Easting, 4289602.3 Northing, estimated from CDSS mapping

software. C. Source: Roubideau Creek, a tributary to the Gunnison River. D. Appropriation Date: June 5, 2023. i. How appropriation initiated: Staff investigations, performing a site visit, and filing of this application. ii. Date applied to beneficial use: n/a. E. Amount: 2 cfs, conditional. F. Uses: The Hooley Ditch water right will be used for direct flow purposes, and the Hooley Ditch structure will also be used to fill the KT Brood Pond, described in Paragraph 5 below. Direct flow uses include irrigation for wetlands and creation and maintenance of wildlife habitat, fish propagation, and to provide flow through or freshening flows to the KT Brood Pond for piscatorial, fish propagation, wildlife, and waterfowl purposes when the KT Brood Pond is holding stored water. i. Description of Irrigation: a. Proposed to be irrigated: approximately 3 acres. b. Description of irrigated acreage: Irrigation will occur within the footprint of the KT Brood Pond and on approximately one additional acre of land surrounding the pond, as shown on **Exhibit A**. Irrigation of the footprint of KT Brood Pond and land surrounding the pond will occur when the KT Brood Pond is operating on a direct flow basis or as a fill and drain event. During a fill and drain event, sufficient water will be diverted through the ditch to irrigate wetlands vegetation, and may be temporarily detained and allowed to drain out naturally to mimic natural wetland functions in a riparian corridor. **5. Claim for Storage Water Right: KT Brood Pond** A. Name of Structure: KT Brood Pond. B. Location of Pond: See **Exhibit A** for a map of structures. i. Legal Description: The KT Brood Pond is located in the SE1/4, SW1/4, Section 29, Township 15S, Range 96W, 6th PM. ii. UTM coordinates: Zone 13, 226085.9 Easting, 4289639.2 Northing, estimated from CDSS mapping software. C. Points of Diversion: The KT Brood Pond will be filled by diversions from the KT Ditch or the Hooley Ditch, described above. D. Source: Cottonwood Creek and Roubideau Creek, tributaries to the Gunnison River. E. Appropriation Date: June 5, 2023. i. How appropriation initiated: Staff investigations, performing a site visit, and filing of this application. ii. Date applied to beneficial use: n/a. F. Amount: 8 acre-feet, with the right to continuous fill and refill when in priority, conditional. i. Rate: 4 cfs, maximum. The KT Brood Pond will be filled by the KT Ditch or the Hooley Ditch, or by both ditches at the same time, at a rate of up to 2 cfs from each ditch, for a combined total maximum of 4 cfs. ii. Once the KT Brood Pond has filled initially, CPW may continuously refill when in priority to keep the pond full. To meet the seasonal needs for fish development and wetlands habitat, CPW may also release stored water and successively refill the KT Pond to develop wetlands vegetation and support fish production seasonally. iii. The maximum depth of the KT Brood Pond will be 4 feet, and the areal extent of the KT Brood Pond is expected to be approximately 2 acres. If the KT Brood Pond is constructed to a depth of less than 4 feet, the areal extent may be increased to allow storage of a maximum of 8 acre-feet. G. Uses: piscatorial, fish propagation, wildlife, waterfowl, recreation, irrigation to support wetland habitat and creation and maintenance of wildlife habitat. i. Description of irrigation: Irrigation will occur within the footprint of the KT Brood Pond and on approximately one additional acre of land surrounding the pond, as shown on **Exhibit A**. Irrigation of the footprint of the KT Brood Pond will occur when the KT Brood Pond is operating on a direct flow basis, by irrigating with water stored in the pond, or when water is released from storage to mimic natural wetland functions in a riparian corridor. **6. Remarks**. The KT Ditch, Hooley Ditch, and KT Brood Pond will operate as an integrated system with the primary purpose to support native fish growth and production and to provide a native fish brood source for the western slope. The targeted native fish include

three species of greatest conservation need in Colorado (i.e., Roundtail Chub, Flannelmouth Sucker, and Bluehead Sucker). CPW will begin diverting water from Cottonwood and Roubideau Creeks in late winter and early spring to create and enhance wetland and native fish brood rearing habitats, operating the system as either a flow-through diversion or a storage system based on seasonal needs. Irrigated wetland habitat will support submergent, emergent, semi-emergent and wetland meadow vegetation. Diversions into the KT Ditch are junior to the Colorado Water Conservation Board's instream flow water right on Cottonwood Creek, decreed in 06CW166, Water Division 4.

7. Name of owners of land upon which structures are located: Applicant. WHEREFORE, CPW respectfully requests this Court enter a decree adjudicating the water rights as described herein, and for such other relief as this Court deems just and proper. (6 pages) **DELTA COUNTY.**

CASE NO. 2023CW3042 (Ref. 10CW19, 2017CW3010). **Applicant:** Deutsch Domestic Water Company, P.O. Box 45, Crawford, CO 81415. **Attorney:** James D. Brown, Brown & Camp, P.O. Box 43, Delta, CO 81416. **Structures and Conditional Water Rights:** Saddle Mountain Seep Ditch and Needle Rock Pond. Conditional decrees entered February 22, 2011, in Case No. 10CW0019 and continued by diligence decree entered in Case No. 2017CW3010, in District Court for Water Division No. 4. **Legal Descriptions:** Saddle Mountain Seep Ditch: W1/4SW1/4SE1/4 of Section 29, Township 15 South, Range 91 West, 6th P.M. approximately 550 feet north of the south section line and 2248 feet west of the east section line. APPLICATION TO MAKE CONDITIONAL RIGHTS ABSOLUTE IN PART AND FOR FINDING OF REASONABLE DILIGENCE. Original and relevant subsequent decrees: Case No. 02CW188, Decree entered January 26, 2004; Case No. 10CW9, Decree entered March 14, 2011; Case No. 17CW3011,

Decree entered July 30, 2017, all in Water Division 4. Name of right: Cottonwood Park Well No.1 (aka Cottonwood Meadows Well No. 1), Permit No. 6130-F. Decreed location: In the SW1/4NE1/4 Section 24, Township 50 North, Range 1 West, N.M.P.M. at a point approximately 1960 feet from the north section line and 1400 feet from the east section line of said Section 24. The Consultation Report in 17CW3011 indicated that the well is 1977 feet south of the north section line and 1467 feet west of the east section line (NAD83, Zone 13, Easting 0332914m, Northing 4272197m). Source: Gunnison River Alluvium. Depth: 12 feet. Amount: 100 gpm. Use: The 100 gpm is decreed absolute for domestic in-house use in 33 units and lawn and garden irrigation of 4 acres in the Ponderosa Mobile Home Park and Cottonwood Meadows subdivisions, located in the NE1/4 of Section 24, Township 50 North, Range 1 West, N.M.P.M., and is decreed conditional for domestic in-house use in 8 additional units in the Ponderosa Mobile Home Park and Cottonwood Meadows subdivisions. Appropriation Date: July 1, 1963. Adjudication Date: 2002. Name of Structure: Cottonwood Park Well No.2 (aka Cottonwood Meadows Well No. 2), Permit No. 57742-F. Decreed location: in the SE1/4NE1/4 Section 24, Township 50 North, Range 1 West, N.M.P.M. at a point approximately 1525 feet from the north section line and 800 feet from the east section line of said Section 24. The Consultation Report in 02CW188 was consistent with this location. The Consultation Report in 17CW3011 indicated that the well is 1586 feet south of the north section line and 764 feet west of the east section line (NAD83, Zone 13, Easting 0333130m, Northing 4272312m). Source: Gunnison River Alluvium. Depth: 108 feet. Amount: 100 gpm. Use: The 100 gpm is decreed absolute for domestic in-house in 33 units and lawn and garden irrigation of 4 acres in the Ponderosa Mobile Home Park and Cottonwood Meadows subdivisions, located in the NE1/4 of Section 24, Township 50 North, Range 1 West, N.M.P.M., and is decreed conditional for domestic in-house use in 8 additional units in the Ponderosa Mobile Home Park and Cottonwood Meadows subdivisions. Appropriation Date: May 14, 2002. Adjudication Date: 2002. Pursuant to previous decrees, the cumulative instantaneous rate of diversion for COTTONWOOD PARK WELL NOS. 1 and 2 shall not exceed 100 gpm, and COTTONWOOD PARK WELL NO.2 shall serve only as a backup for COTTONWOOD PARK WELL NO. 1, and the two wells shall not be operated concurrently. When COTTONWOOD PARK WELL NO.2 is operating as a backup for COTTONWOOD PARK WELL NO. 1, it shall operate under the COTTONWOOD PARK WELL NO. 1's priority. Detailed outline of what has been done toward completion of the appropriation and application of water to a beneficial use as conditionally decreed, including expenditures, during the previous diligence period: The subject water rights are part of an integrated system to supply all beneficial uses of water within the Ponderosa Mobile Home Park and Cottonwood Meadows subdivisions. During the most recent diligence period, two additional dwelling units were connected to the water system served by the subject water rights. Additionally, the Applicants have spent significant resources maintaining the water system. In particular, the Applicants pay a certified operator to operate the public water system, and pay for water quality testing, both as required by CDPHE regulations. Applicants may have completed additional tasks toward completion of the appropriation and reserve the right to supplement the information provided herein. Relief Requested. Applicant seeks to make the conditional water right absolute for use in two additional dwelling units, and a finding of reasonable

diligence with respect to the balance of the conditional water rights, which would be the right to serve the 6 remaining dwelling units. **GUNNISON COUNTY.**

CASE NO. 2023CW3044. (Ref. Case Nos. 08CW166, 16CW3090). Name, address, and telephone number of Applicants: Sheila Ewing Browne and Katherine Browne, 800 Sierra Vista Way, Gunnison, CO, 81230, 970-209-0225. Please direct all correspondence to LAW OF THE ROCKIES, Kendall K. Burgemeister, Atty. Reg. #41593, 525 North Main Street, Gunnison, CO 81230, (970) 641-1903, kburgemeister@lawoftherockies.com. APPLICATION FOR FINDING OF REASONABLE DILIGENCE. In Case No. 08CW166, Applicants' predecessor obtained conditional water rights for the Spritzer Pond, Spritzer Pond Diversion, and Spritzer Well Nos. 1-4. In 16CW3090, Spritzer Pond and Spritzer Pond Diversion were made absolute. In this case, Applicants seek a finding of reasonable diligence with respect to the Spritzer Well Nos. 1-4. Name of rights: Spritzer Wells Nos. 1-4. Original and Subsequent Decrees: 08CW166, entered October 20, 2009; and 16CW3090, entered June 5, 2017, both by the District Court, Water Division 4. The Court granted a one-month extension, through July 2023, for the filing of this application. Decreed Locations: In the NESWNW of Section 13, Township 50 North, Range 1 West, NMPM: Spritzer Well No. 1: 1675 feet from the north section line, 936 feet from the west section line. Spritzer Well No. 2: 1941 feet from the north section line, 949 feet from the west section line. Spritzer Well No. 3: 1639 feet from the north section line, 1323 feet from the west section line. Spritzer Well No. 4: 1915 feet from the north section line, 1298 feet from the west section line. See Exhibit A filed with this Application. Source: Groundwater tributary to Ohio Creek, tributary to the Gunnison River. Appropriation Date: November 27, 2008. Amount: 15 gpm per well / 0.536 acre-feet per well per year. Uses: Each well is decreed for domestic use inside one single-family dwelling, irrigation of 2500 square feet of landscaping, and stock water. Relief Requested: Applicants seek a finding of reasonable diligence with respect to the Spritzer Well Nos. 1-4. The Spritzer Pond, Spritzer Pond Diversion, and Spritzer Wells are part of an integrated project, in that the Pond and Diversion are used to augment the use of water from the wells. During the diligence period, Applicants replaced the headgate on the ditch that supplies the Spritzer Pond. The cost of that project was approximately \$6,000. The Applicants also repaired the embankment of the pond, and routinely cleaned and burned the ditch feeding Spritzer Pond. The owner of the land upon which any new diversion or storage structure or modification to any existing diversion or storage structure or existing storage pool is or will be constructed or upon which water is or will be stored: Applicants. **GUNNISON COUNTY.**

Uses: Commercial, industrial, domestic, irrigation of 2.3 acres in the W1/2NW1/4 Section 18 and E1/2NE1/4 Section 13, T14S, R85W, 6th PM, fire protection, and livestock watering purposes. Appropriation Date: May 31, 2016. WHETSTONE INDUSTRIAL PARK WELL NO. 2. Decreed Point of Diversion: A point in the SW1/4NW1/4 Section 18, T14S, R85W, 6th PM, 2037 feet from the north section line, and 1195 feet from the west section line (UTM coordinates: Zone 13, Northing 4300637, Easting 331622, NAD 83). Source: Groundwater tributary to the Slate River, tributary to the East River, tributary to the Gunnison River. Amount: 0.167 cfs (75 gallons per minute), 30.5 acre-feet per year (conditional). Uses: Commercial, industrial, domestic, irrigation of 2.3 acres in the W1/2NW1/4 Section 18 and E1/2NE1/4 Section 13, T14S, R85W, 6th PM, fire protection, and livestock watering purposes. Appropriation Date: May 31, 2016. Alternate points of diversion. WHETSTONE INDUSTRIAL PARK WELL NOS. 1 and 2 are alternate points of diversion, the 75 gallons per minute and 30.5 acre-feet per year diversion limits are cumulative limits that apply to the combined operations of the two wells. WHETSTONE INDUSTRIAL PARK EXCHANGE. Lower Terminus: The outlet works of Crystal Dam, located in the SE1/4 SE1/4 NW1/4, Section 14, Township 49 North, Range 7 West, N.M.P.M. Upper Terminus: The point of diversion of Whetstone Industrial Park Pump and Pipeline, as described above. Source of Substitute Supply: Water stored in Blue Mesa Reservoir and leased from the United States Department of the Interior, Bureau of Reclamation. Amount: 1.16 cfs (conditional). Maximum volume exchanged per year: 11.660 acre-feet per year. Proposed beneficial uses: Recreational, fishery, fire protection, and replacement of depletions for commercial, industrial, domestic, irrigation, and livestock uses through filling and refilling of the Whetstone Industrial Park Pond and pursuant to the plan for

augmentation decreed in 16CW3035. Appropriation Date: May 31, 2016. The locations of the structures are illustrated on the map filed with this Application as Exhibit A. Detailed outline of what has been done toward completion or for completion of the appropriation and application of water to a beneficial use: The Whetstone Industrial Park Well No. 1 and Well No. 2 were drilled. The Whetstone Industrial Park Pond was constructed. The Whetstone Industrial Park Pump and Pipeline was installed. A water system was installed delivering water from the Wells to each of the lots within the Whetstone Industrial Park. All lots within the Whetstone Industrial Park were sold by the developer. The Applicant, a property owners association for the development, was formed. The common areas and water rights associated with the development were transferred from the developer to the Applicant. A survey and stage-area-capacity table for the pond were ordered. An application for a water service contract was submitted to the Bureau of Reclamation. One lot owner has connected to the water system but has not yet started applying water to the decreed beneficial uses. Two additional lot owners have commenced construction and are anticipated to connect to the system in the near future. Relief Requested: The Applicant seeks to make absolute the Whetstone Industrial Park Pump and Pipeline and Whetstone Industrial Park Pond in their entirety. The Applicant seeks a finding of reasonable diligence for any portions of the subject conditional water rights that are not made absolute in this proceeding. The structures are on land owned by Applicant.

CASE NO. 2023CW3049 San Miguel County **Application for Finding of Reasonable Diligence, Change of Water Rights, and to Make Absolute in Part.** Applicant: Gray Head at Telluride Property Owners Association, Inc., c/o Christopher L. Geiger & Andrea J. Hall, Balcomb & Green, P.C., P.O. Drawer 790, Glenwood Springs, CO 81602; 970-945-6546. Applicant is the Property Owners Association for Gray Head at Telluride and owns and operates water rights and related infrastructure for the benefit of its members, who are property owners within the Gray Head at Telluride Development. Applicant requests a finding of reasonable diligence for the subject conditional water rights confirmed to Applicant in 99CW247 and continued conditional 08CW83 and 17CW3003. These conditional water rights include six wells, seven springs, six ditches, thirty-nine ponds, and two appropriative rights of exchange. Applicant also requests that portions of fourteen conditional water rights be confirmed as absolute. Applicant requests a change for water rights that include alt. storage locations, and alt. locations to conform decreed locations to as-built locations. All the water rights that are the subject of this Application are part of an integrated water supply system that provides water service to the Gray Head at Telluride Development, which includes twenty-five lots, each approximately 35 acres in size. Each lot will eventually contain one principal residence and one guest residence. The Gray Head at Telluride Development property, locations of all conditional water rights first decreed in 99CW247, and alt. locations for some of these water rights as decreed in 08CW83, are depicted on Exhibit A on file with the Water Ct. First Claim for Findings of Reasonable Diligence: the application on file with the Ct. contains a detailed outline of the work performed during the diligence period. Original Decree: 99CW247, Dist. Ct, entered on 7/18/2002. Subsequent Decrees: 08CW83 entered on 1/18/2011 and 17CW3003 entered on 7/17/2017. A tabular summary of these rights is included in Exhibit B on file with the Water Ct. Groundwater Rights - Wells: In 99CW247, the Ct. confirmed conditional water rights for the following six well structures, each with an approp. date of 07/31/1997. Each well is decreed as an alt. point of diversion for the other five well structures described herein, and for the water rights decreed to the springs described herein and ditches described below. 99CW247 Decree, ¶13. Each of the six wells below are decreed for dom., irr., stock watering, and fire protection purposes, and for use through storage in and later release from the ponds described below for irr., pisc., stock watering, rec., and fire protection purposes. Irr. use, directly and through storage, is for up to 15 acres in San Miguel Cty., CO, located generally within the E1/2 NE1/4 and the NE1/4 SE1/4 of Sec. 22, within all of Sec. 23, and within the NE1/4 NW1/4 and the N1/2 NE1/4 of Sec. 26, all sects. in T. 43 N., R. 10 W., N.M.P.M. Certain of these wells may also supply water to a non-potable water system that will fill the ponds described herein. Structure: Gray Head Well No. 1.
